

## Kidney Function Test Report

### Patient Details

Name: Rohan Patil  
Age: 36  
Gender: Male  
Report Date: 2025-11-29  
Lab ID: LAB-CKD-20251129

### Laboratory Results

Serum Creatinine: 1.6 mg/dL (Ref: 0.7 – 1.3)  
Blood Urea Nitrogen (BUN): 32 mg/dL (Ref: 7 – 20)  
eGFR: 55 mL/min/1.73m<sup>2</sup> (Ref: > 60)  
Serum Potassium: 4.9 mEq/L (Ref: 3.5 – 5.1)  
Serum Sodium: 141 mEq/L (Ref: 135 – 145)  
Urine Protein: 1+ (Ref: Negative)  
HbA1c: 6.4% (Ref: 4.0 – 5.6%)

### Doctor Comments:

Kidney function is mildly reduced (possible early CKD Stage 2).  
Urine protein and BUN slightly elevated—monitoring required.  
Recommend hydration improvement, low-salt diet, and repeat KFT after 4–6 weeks.  
Consider early nephrology evaluation if symptoms persist.
